PROFESSIONAL SUMMARY

Software Developer at IRIZID Technologies working across the stack — front-end skills in HTML5, CSS3, and JavaScript (ES6), plus .NET development in Visual Studio and SQL Server database work. BCA graduate combining software development training with real business-operations experience across warranty administration, accounting, and software sales. Focused on building reliable, user-friendly applications and growing as a full-stack developer.

WORK EXPERIENCE

Software Developer — IRIZID Technologies Pvt. Ltd. *Sep 2026 – Present*

- Developing and maintaining applications on the .NET stack using Visual Studio.
- Working with SQL Server Management Studio 22 for database queries and data management.
- Ramping up on the team codebase and development workflow in the first weeks on the job.

Warranty Incharge — Ashok Leyland *Aug 2025 – Sep 2026*

- Managed end-to-end warranty claims processing, documentation, and cross-team coordination.
- Ensured timely, accurate resolution of warranty issues while maintaining customer satisfaction.

Accountant — Under Chartered Accountant (CA) *2022 – 2023*

- Handled day-to-day accounting entries, bookkeeping, and financial documentation with accuracy and compliance.
- Worked with Tally ERP9 / Tally Prime for routine financial operations.

Software Sales Executive — Creative IT Solutions Pvt. Ltd. *2020 (6 months)*

- Managed software product sales and built strong client relationships through clear communication.
- Conducted product demonstrations and resolved customer queries to support the sales process.

INTERNSHIP

Software Development Intern — Cognifyz IT Solutions (Online) *Jul 2026 – Aug 2026*

- Built responsive web pages with HTML5, CSS3, and JavaScript (ES6) as part of guided front-end tasks.
- Practiced DOM manipulation to create interactive page elements and dynamic interfaces.
- Debugged and tested code to resolve functional and layout issues.
- Used Git & GitHub for version control on structured development tasks.

PROJECTS

Diabetes Prediction System — BCA Final-Year Project

- Built a machine learning-based system to predict diabetes likelihood from patient data.
- Handled data preparation and applied core model-building concepts end to end.

TECHNICAL SKILLS
